

HI, NICE TO MEET YOU

Reverse Logistics USA - founded in 2012 by two brothers, Israel and Larry Greenbaum with a humble idea to source and re-sell individual devices and accessories to end users via e-commerce channels. Since then, our small yet diverse and talented team have been able to form robust and long established relationships with our suppliers and customers, allowing us to partner with some of the major US Carriers, OEMs, and Distributors to turn inventory challenges into business opportunities in a wholesale capacity on an international scale.

Our ethical responsibilities as a moving part in the world of consumer electronics also led to us obtaining the SERI R2 Certification which focuses on the reduction of e-waste in landfill as well as responsible handling and sanitization of user data. Further to this we have obtained ISO 9001, 14001 and 45001 certifications as part of our commitment to meeting customer requirements, maintaining worker health and safety, and reducing our impact on the environment as a result of our operations.
