Q: Is there anything else you would like to share about your journey as co-founders and the growth of your electronics wholesale online store?

Josh: As founders, our journey has been an incredible learning experience. We've realized the importance of being open to learning from everyone, particularly our team members. Their diverse perspectives and expertise have been invaluable in shaping our business and driving its growth.

In addition to that, we strongly believe in creating products and services that not only add value to people's lives but also contribute positively to the environment. Sustainability and ethical practices are integral parts of our business philosophy, and we strive to incorporate them into every aspect of our operations.

David: I agree! Overall, our journey as founders has taught us the significance of continuous learning, embracing diverse perspectives, and ensuring that our business creates a positive impact on both people and the environment. We remain committed to these principles as we continue to grow the business and shape the way our customers access inventory.
