

Q: How can Olympus Lending approve businesses for loans without having established credit or a credit card?

Doug: There is no risk or impact to apply or reach out to Olympus Lending to inquire about getting funds for your business. We will work with you to get funding or help you understand what requirements are needed for funding in the near future. There is no impact to your credit for applying.

Q: Can you share a couple success stories?

Doug: We have a handful of stories on dealers getting funding in busier times for inventory to maximize their sales. This is the core of our success in this industry.

In November through December of 2022 a dealer with 10+ locations took out 20 inventory advances through a Master Dealer with minimal fees and interest. They claim to have not been able to hit sales needed without inventory on the shelves.

Another example on a bigger scale, we helped a retailer expand from 3 locations to 30 locations within an 18-month period. We set them up on funding for initial startup costs and additional capital for payroll and other expenses to get these doors up and running.

Q: Where can businesses go to start the loan process?

Doug: Your business deserves to have the necessary revenue for growth.
